RIDING GEAR

Neck Pro Tech

Inexpensive protection from possible serious injury. The basic function of the Neck Pro Tech is simple. By limiting the range of motion the head can travel, the risk of hyperextension is reduced. When the Neck Pro Tech is worn correctly, the unit has full clearance around the neck, allowing a normal range of motion by not supporting the neck through direct contact. When the head travels too far in any one direction, the lower edge of the helmet will contact the top surface of the Neck Pro Tech and absorb the energy reducing the possibility of a neck or collar bone injury.

We have taken many aspects into account while creating the final product. We used anatomical dummies for sizing and operation. The shape and function was computer designed and field tested over several years, with hundreds of man-hours put in on all types of machines. The materials used are of the highest quality and were chosen for their function and durability in our products. The urethane foam that forms the Neck Pro Tech is of a density that while resilient, will absorb and disperse much of the impact energy in a compromising situation.

Armor Adapter Kit attaches the Neck Pro Tech to any chest protector in the market place. Comes with 8-snaps, 8-screws and nuts, 2-10' connecting straps, Drill bit, and high strength glue70 5002 00

Neck Pro Tech Lite

Pinto Hinged Knee Support

The most popular hinged support in the ARS Line has many features found in the Mustang, including the independent self centering hinged blades. Shorter overall than the Mustang, the difference is found equally between the calf and thigh, and is therefore fitted with two adjustment straps. The Pinto provides excellent torsional stability and lateral support. Optional plastic knee cups available.

Natures' breathing system...

Observation of the natural world has led to many of man's greatest achievements, and throughout the history of scientific discovery, man has turned to nature for inspiration.

In reality there is not one single problem encountered by man which cannot be resolved by adherence to the natural physical laws that govern all that occurs within our world.

Man is a warm blooded animal who's core body temperature is maintained at approximately 36°C by various thermoregulatory mechanisms. However the ability to maintain this status in adverse environmental conditions is limited.

In an attempt to resolve this problem, we abandoned the traditional approach to breathable systems and instead examined the means by which leaf plants remove vast quantities of water through otherwise impermeable surfaces. A process known as transpiration.

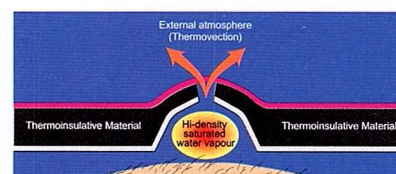

The principle structure of this process is the Stomata. The Stomata provide a specific set of physical circumstances which enable extremely efficient removal of water vapor.

This comfort zone is comprised principally of two elements, temperature and humidity. Tolerance of temperature change is good, but the uncontrolled accumulation of water vapor in a knee support results in extreme discomfort.

Stomatex is the transfer of nature's principal into man made materials, and mimics precisely the actions of transpiration.

The result is a fabric system which can exert remarkable control over the knee support temperature and humidity.

How to measure for proper knee brace fit and size.

Measure all the way around leg, over knee cap area, and use the following reference chart for proper ordering size

Sml.	Med.	Lg.	X Lg.	XX Lg.
12 1/2" - 13 3/4"	13 3/4" - 15"	15" - 17"	17" - 19"	19" - 21"

\$220.00

Mustang Hinged Knee Support

A Knee support of exceptional strength, yet provides a high degree of mobility incorporating the unique features of a new design hinge assembly. This revolutionary hinge assembly provides mechanical lock out before hyper extension of the knee joint occurs, as well as allowing full natural movement of the joint. The self centering hinge guide plates are the key to it's excellent lateral support characteristics that assist in prevention of damage caused, or aggravated by, lateral stress forces or twisting of the knee. The hinges are manufactured from a nylon composite for rigidity, and are fully removable from the carrying sleeve for washing. The support is fitted with four Velcro straps allowing precise location and individual adjustment. Optional plastic knee cups available.

SR-2 Boots

Sidi's patented "sole replacement system" not only extends the life of the boot, it dramatically increases its arch support capabilities. The Sidi SR-2 with its internal steel arch and tough plastic base offers extra support for supercross landings, high speed desert "G outs" or hidden stumps in the woods. The sole replacement system combined with the following fine features make the Sidi SR-2 the finest off road boot in the world!

- Backed by Sidi's lifetime guarantee against defects in materials and workmanship.
- Constructed of the finest Italian top grain leather.
- Replaceable four buckle closure system featuring Sidi's exclusive 25 position "cam-lock" buckle, the best available!
- Extra long top straps to accommodate riders with large calves.
- Full exterior plastic plating on all potential impact, stress and high wear areas.
- Soft plastic articulated panels at all key flex points.
- Full height, fully padded inner tongue-a Sidi exclusive!
- Double layer of leather on the inner side of each boot to protect the rider from heat transferred from the motorcycle.
- Three super color combinations in sizes 8-13.

SIDI BOOTS

Start

\$207.00

Sidi's all new road racing boot, the "Start", was created with the goal of combining the most modern styling with the finest features. After you look over the photo and consider the benefits listed below Sidi is sure you'll agree that the Start is one of the best boots on the grid.

- Constructed from Lorica and lined with ventilated top grain leather.
- Zipper and velcro closure ensures a great fit, no matter the diameter of the riders calfs.
- Padded shin plate.
- Internal, anatomically positioned, ankle ball plastic protection plates.
- External, injection molded, plastic ankle support brace.
- Elastic Kevlar panels in all the key areas.
- Sidi's exclusive screw on toe scuff pads.
- Additional scuff pads on the outside of the foot and calf.
- The "Start" is backed by Sidi's lifetime guarantee against defects in materials and workmanship.

Sidi Boot Parts

ATTACK GRAPHIC KITS

\$50.00

THE ATTACK GRAPHICS HAVE A UNIQUE DESIGN FOR EACH APPLICATION AND ARE MADE FROM SUPER THICK 15MIL VINYL WITH QUALITY 3M ADHESIVES USED ON BACK. ALL GRAPHICS ARE APPLIED FROM THE BACK OF THE VINYL SO IT WILL NEVER WEAR OFF. ONLY PRO'S CHOICE USES A ADHESIVE SPECIFICALLY FORMULATED TO WORK ON PLASTIC FUEL TANKS!

PRO'S CHOICE SEAT COVERS

\$60.00+

THE ATTACK SEAT COVER, TOUGH 15MIL VINYL SEAT PANELS WILL RESIST KNEE BRACE WEAR AND TEAR WITH EASE. EACH SEAT GRAPHIC PANEL HAS AN EXTRA LAYER OF PROTECTION IN ORDER TO PROTECT THE GRAPHIC FROM WEARING OFF FROM THE INSIDE DUE TO FRICTION WITH THE SEAT FOAM. THE UPPER IS CONSTRUCTED OUT OF EXCLUSIVE MATERIAL THAT TOOK THREE YEARS FOR PRO'S CHOICE TO FULLY DEVELOP. THE ATTACK SEAT OFFERS THE ULTIMATE IN TRACTION EVEN WHEN WET, IS SUPER DURABLE, OIL RESISTANT AND WILL NEVER CRACK IN COLD CONDITIONS.

THE STANDARD SEAT COVERS HAVE SUPER DURABLE BALLISTIC NYLON, MUCH STRONGER THAN EVEN KEVLAR, AND A DE-EMBOSED TOP THAT GIVES YOU JUST THE RIGHT AMOUNT OF TRACTION.

Honda Plastic

Acerbis offers the highest quality, lowest priced, best fitting and most complete line of replica plastic in the world! Just check out these features...

- A high quality replacement for stock at a fraction of the OEM price.
- Injection molded quality.
- Side panels and radiator scoops sold in pairs.
- Pre-marked or pre-drilled for easy trouble free mounting.
- Rear fenders for enduro bikes feature a smooth top MX look and have no fixtures for mounting standard taillights, use Acerbis Mollsoft taillight (70-27) if lighting is needed.
- Standard colors or optional "team" colors.
- Decals sold separately.

GAS TANKS

Painted Sportster® Tank

Natural Sportster® Tank

Fuel Tanks For Harley Davidsons™

Acerbis' fuel tanks are designed in the USA and rotationally molded out of the most durable material offered for fuel tank construction, Composite-Nylon. These heavy duty tanks will never dent or crack, have no seams to split, are unaffected by vibration and accept primers and paint with ease.

\$339.95

Tanks For Sportster® Models

- 4.1 gallon capacity.
- Tank uses standard cap.
- Complete with all needed mounting instruction and hardware.
- Painting guidelines included

SPORTSTER®

Fuel Tank 82-94 (most appl.)	11 1598 13
Fuel Tank 95-97	11 1608 13

Stretch Tank For Softail® Models

- 5.1 gallon capacity.
- Stretch design fits Soft Tails 84-97 **\$475.00**
- Rear stretched sections hold fuel, adding to the overall capacity without increasing width.
- Uses standard fuel valves and caps
- Flush mount fuel filler caps.
- Due to the stretch rear section of this tank, it may interfere with some seats. Confirm its fit before painting.

SOFTAIL®

Fuel Tank 84-97	11 1607 13

SILENCERS

C35 Carbon Cross Silencers

Finally a well thought out carbon fiber silencer that combines the extreme light weight of carbon fiber with the durability of a conventional silencer.

Acerbis' C35 Carbon Fiber Silencer offers the first design that isolates an extruded carbon fiber body from the end caps and mounting bracket. Acerbis' exclusive, injection molded, adjustable mounting bracket combined with slip fit end caps achieve this design goal. With this design fatigue around the end cap or mounting bracket rivets is eliminated, greatly extending the units service life! Some of the C35 carbon crosses outstanding features are...

- 20-30% Lighter than stock. **\$114.00**
- Fully rebuildable.
- Throaty "factory bike" exhaust note.
- Each unit comes complete with an extra repacking kit.
- Each unit covered by a one year guarantee against defects in materials or workmanship!

Nylon Spark Arrestor-Silencers

After years of research, Acerbis has developed a progressive new use of high temperature nylon composites in a motorcycle application.

Each 035 model is specifically designed for it's application. The 035's extra long body offers the best combination of horsepower curves and quiet sound output for off road use, complete with an Acerbis designed "Turbine Star" USFS approved spark arrestor.

Available in a "cool" factory anthracite grey color, and every model comes complete with an extra repacking cartridge. Dirt Rider Magazine**** 4-Star rated, the best!

HANDLEBARS

Acerbis HT55 \$59.00

Aluminum Handlebars

The new HT55 technology aluminum handlebars are the highest quality and the strongest crossed braced handlebars available. Acerbis uses only the finest ergal 55-7075 T6 extruded aluminum tubing. This tubing resists bending better than any other material used in a handlebar application.

Combine this with a cross bar mounting bracket that won't slip or loosen and a knurled mount and left grip areas and you have a bar that the rider can expect years of quality service from. Comes in a natural titanium color, complete with cross bar pad.

Acerbis HT03 \$39.00

Aluminum Handlebars

The HT03 Acerbis aluminum handlebar is for those riders who want most of the great features of the HT55 model at a reduced price. The HT03 features tough 7003 extruded aluminum tubing, a knurled mount and left grip area as well as a non slip cross bar mount and radical cross bar pad. Available in the three most popular bends in a natural aluminum color.
